Price changes and individual estimates

Crematorium operators control these prices and may amend them. We review operator information when notified of a change and before relying on it for an individual funeral estimate.

The written estimate provided for a funeral will show the charge applicable to the selected crematorium, service, date and time. A current written estimate takes priority if it contains a more recent verified operator charge than this document.

Other optional products and services may be available. Please consult the operator's official information or ask Wealden Funeral Services for the price of a particular option before ordering it.
